DETAILED ACTION

This Office Action is responsive to the Election and Amendment filed on 7/27/04. Accordingly, the previous restriction has been withdrawn. Claims 1-24, 26-32 and 35-61 are currently pending.

Drawings

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 10-18, 49 and 53 are objected to because of the following informalities:
Claim 10 recites the limitation "2^{Pp-ni}" on line 19. Parameter "P" is not defined. It appears that the limitation should be changed to --2^{P-ni}--.

Appropriate correction is required.

Claims, depended on claim 10, are therefore also objected.

Specification

3. The abstract of the disclosure is objected to because the form and legal phraseology "said" is used in the abstract on line 1. Correction is required. See MPEP § 608.01(b).

Art Unit: 2611

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Allowable Subject Matter

5. Claims 1-9, 19-24, 26-32, 35-48, 50-52 and 54-61 are allowed.
6. Claims 10-18, 49 and 53 would be allowable if rewritten or amended to overcome the objection, set forth in this Office action.

Conclusion

7. This application is in condition for allowance except for the above formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. References 5191576, 6353637 and 4980897 are cited because they are pertinent to the claimed invention.
